Professional Summary

DevOps and Platform Engineer with 8.7 years of experience designing cloud-native platforms, automating infrastructure and application delivery, and implementing secure CI/CD and GitOps workflows across Azure, AWS, and GCP. Hands-on experience with AKS, Kubernetes, Terraform, Azure DevOps, Jenkins, Argo CD, Ansible, Docker, cloud networking, observability, security, and Internal Developer Platform engineering. Proven 4 years of experince in fullstack web and mobile application development.

Skills

Languages: Python, JavaScript, Golang

Frameworks: Django, Django REST, Angular, FastAPI, ReactJS, Vite

Cloud: Azure, AWS, GCP

Containers/Kubernetes: Docker, Kubernetes, AKS, Helm, Kustomize

Infrastructure as Code: Terraform, Ansible, Ansible Tower

CI/CD & GitOps: Azure DevOps, Jenkins, GitHub, Argo CD, GitOps, Octopus Deploy

Azure Platform: AKS, ACR, Key Vault, Entra ID, Azure RBAC, Managed Identity, Workload Identity, Azure Policy, Azure Monitor, Log Analytics, Private Endpoint, Private DNS, Hub-Spoke Networking

Kubernetes Platform: RBAC, Namespace Isolation, ResourceQuota, LimitRange, NetworkPolicy, CSI Storage, Autoscaling, OPA/Gatekeeper

Observability: Prometheus, Grafana, Azure Monitor, Log Analytics, OpenTelemetry, AppDynamics

DevSecOps/Security: OPA/Gatekeeper, SonarQube, BurpSuite, Mend, Snyk, Nessus, OWASP ZAP, HashiCorp Vault

Platform Engineering: Backstage IDP, Internal Kubernetes Platform, Namespace-as-a-Service

Tools/Databases: Git, Linux, PostgreSQL, MongoDB, Jira, JFrog Artifactory, Nexus

Experience

TEK Systems Nov 2024 -- Present
Senior Software Engineer *Hybrid*

- Built and deployed ReactJS + Vite components for HSBC Choase platform with FastAPI + MongoDB backend.
- Designed Jenkins pipelines and Ansible playbooks automating 90% of Hazelcast-based deployments.
- Integrated OpenTelemetry and AppDynamics, reducing incident detection time by 30%.
- Reduced manual SRE tasks by 70% using Backstage IDP YAML templates and plugins.
- Provisioned modular cloud resources using Terraform and Ansible Tower.
- Led TPAM/PAR automation to reduce manual approvals across deployments.

Enterprise Internal Kubernetes Platform (IKP) on Azure

Azure | *Terraform* | *Azure DevOps* | *AKS* | *Kubernetes* | *Docker* | *Argo CD* | *Helm* | *Kustomize* | *ACR* | *Key Vault* | *Entra ID* | *Azure Policy* | *OPA/Gatekeeper* | *Prometheus* | *Grafana* | *GitOps*

- Designed and implemented a production-style Internal Kubernetes Platform (IKP) on Azure using Terraform and AKS, providing reusable infrastructure and a managed Kubernetes foundation for application teams.
- Architected hub-spoke networking with private AKS, private endpoints, Private DNS, NSGs, controlled ingress/egress, and WAF for secure platform connectivity and workload isolation.
- Implemented Entra ID, Azure RBAC, Managed Identity, and Workload Identity for least-privilege access between AKS workloads, ACR, Key Vault, and Azure services without long-lived credentials.

- Built multi-tenant Namespace-as-a-Service capabilities using Kubernetes RBAC, ResourceQuota, LimitRange, and NetworkPolicy to provide isolated and governed application environments.
- Implemented GitOps-based platform and application delivery using Argo CD, Helm, and Kustomize with automated synchronization, drift detection, self-healing, and environment-specific configuration.
- Established policy-as-code guardrails using OPA/Gatekeeper and Azure Policy, enforcing security, governance, and operational standards across Azure and Kubernetes layers.
- Developed reusable Terraform modules and Azure DevOps YAML pipelines with validation, security scanning, deployment approvals, and environment-specific infrastructure delivery.
- Integrated ACR, Key Vault, CSI-based persistent storage, and Workload Identity with Kubernetes workloads for secure image distribution, secrets management, and stateful application delivery.
- Implemented observability using Azure Monitor, Log Analytics, Prometheus, and Grafana with dashboards, alerting, SLIs/SLOs, capacity monitoring, and production troubleshooting workflows.
- Designed the platform for high availability, autoscaling, disaster recovery, and controlled multi-environment operations with architecture documentation, runbooks, and failure/recovery scenarios.

Hexaware Technologies Sep 2021 -- Nov 2024
Senior Technical Analyst *Remote*

- Delivered 50+ secure CI/CD pipelines across Jenkins, Azure DevOps, and AWS CodePipeline.
- Automated release workflows across GitHub, Octopus Deploy, and customized Bash + Python templates.
- Developed Golang-based tool for bulk Git repository management using Backstage IDP.
- Provisioned secure cloud infrastructure with Terraform + Ansible across Azure/AWS/GCP.
- Managed containerized workloads using Docker and Kubernetes with HA and scaling.
- Migrated 100+ artifacts from Nexus to JFrog using OS-level scripts.
- Implemented end-to-end DevSecOps using SonarQube, OWASP ZAP, BurpSuite, and Vault.
- Enforced Azure security using RBAC, Azure Policy, Key Vault, Defender for Cloud, and Sentinel.

Creative Virtual May 2021 -- Aug 2021
Software Engineer *Remote*

- Designed Angular frontend and Django API backend for Admin Panel application.
- Deployed application to cloud and containerized it with Docker for client delivery.

Terse Software Feb 2018 -- Apr 2021
Software Engineer *Onsite*

- Led development of full-stack web and mobile applications for Turtlebean & NPTI projects.
- Collaborated with stakeholders for feature delivery and ensured end-to-end maintenance.

Projects

Food Mess App -- Python/Django REST *GitHub*

- Built full REST API backend to manage mess subscriptions, orders, and users.

Bulk GitRepo Remover -- Golang *GitHub*

- Automated bulk Git repository deletion for platform cleanup and integrated the workflow with Backstage.

Education

MGM's College of Engineering Nanded, Maharashtra
B.E. in Computer Science *Aug 2013 -- Jul 2016*
